Projects

- **Financial dashboard:** Responsive financial dashboard created using React, Bootstrap & ChartJS. The stock screener employs the use of multiple financial APIs in order to create a fully functional financial tool. Pricing information, graphs, relevant news, and financial ratios are rendered dynamically as needed by user. Challenges included caching and persisting API data, asynchronous querying, and the implementation of a trie data structure for autocompleting ticker suggestions.
- **Pixel sorting application:** Small application built using React. Takes user uploaded images and reorders individual pixels based on selected sort option via canvas API. Worked on this project to both learn more about sorting algorithms as well as canvas image manipulation.
- **Twitter-bot:** Simple twitter bot that parses JSON response from twitter API and replies to user's tweet with augmented text data. Built with Node.js and deployed to Heroku.
- **Small business / personal websites:** Built and delivered several small business websites, as well as a personal music blog, using vanilla JS, HTML, CSS, and bootstrap. Small business websites include baked goods website and concrete construction website. Both were delivered on time and within budget. All were developed with responsive design in mind.
- **Portfolio:** Responsive portfolio website built using React, Bootstrap, and a handful of React libraries. The portfolio site is a single page with two themes. This presented certain obstacles in terms of properly rendering components and their styles. Additionally, the interactions of various React libraries lead to persistent and unforeseen bugs.

Skills

- **Languages:** JavaScript, HTML, CSS
- **Frameworks:** Bootstrap 4, React
- **Libraries:** React-Bootstrap, Router, ChartJs
- **Secondary:** Adobe Photoshop, InDesign & Illustrator, Github

Education

The Ohio State University

B.A. English, minor in General Business; GPA: 3.9

Columbus, OH

Aug 2017

Work History

Augustine, Food Server

New York, NY

Aug 2018 – April 2020

- Work with team of varying size in high a volume, high-pressure environment
- Routinely generate \$25,000+ amongst staff in nightly revenue
- Interpret needs of guests and tailor experience appropriately

M at Miranova, Food Server

Columbus, OH

Aug 2016 - Aug 2018

Farrago Quarterly, Editor-in-Chief

Columbus, OH

Dec 2016 - Jun 2017

- Lead team of editors through drafting and editing process
- Build and design final publication for print and online distribution
