Objective

I am a self-taught front-end developer with a passion for learning, problem solving, and people. My current objective is to use the knowledge and skills I've acquired over the past year to shift from a career in fine dining hospitality to the dynamic and engaging field of web development.

Education

The Ohio State University   **Columbus, OH**
B.A. English Creative Writing, minor in General Business; GPA: 3.9   Aug 2017

Skills

- **Languages:** JavaScript, HTML, CSS
- **Frameworks:** Bootstrap 4, React
- **Libraries:** React-Bootsrap, Router, & ChartJs
- **Secondary:** Adobe Photoshop, InDesign & Illustrator, NodeJS

Projects

- **Stock Screener:** Responsive financial dashboard created using React, Bootstrap & ChartJS. The stock screener employs the use of multiple financial APIs in order to create a fully functional financial tool. Pricing information, graphs, relevant news, and financial ratios are rendered dynamically as needed by user.
- **Personal Websites:** A mixture of responsive personal websites built from scratch using JS, HTML, and CSS. Websites include a baked goods website, a music blog, and concrete construction website.
- **Portfolio:** Responsive portfolio website built using React, Bootstrap, and a handful of React libraries. The portfolio site is a single page –with two themes-- which presented certain obstacles in terms of properly rendering components.

Work History

Augustine, Food Server   **New York, NY**
                                                                   Aug 2018 - Present
