Relevant Work Experience

True Classic, Front End Developer

Remote, NY | Dec 2023 - Oct 2024

- Worked with an international team to scope, plan, and develop all manner of frontend projects for the True Classic webstore, a 250m+ yearly online revenue storefront. Tasks included but were not limited to: core storefront functionality expansions, third party vendor integrations, bug fixes, CRO A/B testing, end to end testing, participating in code reviews, cross browser QA, and deployment
- Built and owned all key responsibilities related to the development of the True Classic Warehouse, a Hydrogen / React based storefront that leveraged Shopify's headless capabilities. The TC Warehouse saw average speed improvements of 300%, as well as a 40% increase in CRV, compared to the main storefront.
- Offer technical insight directly to executive leadership for anticipated projects and marketing efforts

Lunar Solar Group, Shopify Front End Developer

Remote, NY | June 2023 - Nov 2023

- Translated detailed Figma designs across a wide range of high end client stores into complex and pixel perfect LPs, PLPs, PDPs, carts, and meganavs
- Worked as part of a fast paced team, leveraging agile methodology, to accommodate all client requests by scoping project details and forecasting possible setbacks / roadblocks during development process
- Worked on multiple versions of client stores using a mixture Git/Github, NPM, Theme Kit, and Shopify CLI

iRecon Marketing, Full Stack Developer

Remote, NY | Oct 2022 - June 2023

- Built and deployed mobile app using React Native to help drive customer growth and engagement
- Interacted with complex APIs such as Klaviyo, ReCharge, and Shopify to process and store customer data in our own database in order to write programs for retention and acquisition strategies

Obvi, Web Developer

Kearny, NJ | Dec 2021 - Sept 2022

- Refactored entire platform - including all previously existing functionalities, styles, and features - from Shopify 1.0 to 2.0 platform, more than doubling site speed and generally improving UI/UX for the 2.8m yearly visitors
- Rewrote and custom built a previously paid for service for internal use, netting a minimum estimated \$120,000 in yearly profit while also eliminating the cost of working with said 3rd party service
- Directly worked with CEO, CMO, and 3rd party funnel analytics team, ranging from creation of landing pages, upsell / cross sell features, API integrations, A/B testing, and all manner of bug fixes and adjustments

Education

Ohio State University

B.A. English, Minor in General Business; GPA: 3.9

Columbus, OH | 2013 - 2017
